Cleveland, Ohio 44104

Dear Glenda,

I really appreciate you stopping by my office and introducing yourself. It was good to finally meet with you and talk about our use of the RoadQuake 2 folding temporary portable rumble strips.

Late last fall the State of Wisconsin purchased these portable rumble strips for use within the State but primarily for use at construction sites on State roads within Marathon County. Marathon County Highway Department has placed the RoadQuake 2 rumble strip safety devices at various construction projects on our four lane roads and our crews have experienced a safer work area due the reduced speed of the traffic within the work zone. Our workers are happy with the results that the portable rumble strips provide in today's high volume traffic areas.

Sincerely,

Jeff Koppa
